Dear Sir/Madam,

Re: Appeal for post Ebola survivors

Referencing the above subject, the kissy UMC Eye Hospital wishes to appeal for financial support to be given to post Ebola survivors that have signs and symptoms of uveitis, and at the same time very poor to finance their treatment & Medications in a bid to restore their sights. The hospital has catalogued a good number of cases that require treatments but just can't cope up with the logistics challenges involved especially in accessing the rural poor for rollout of eye care delivery services.

The hospital will appreciate if your institution may provide to facilitate the eye treatment & medication for 400 (Four Hundred post Ebola survivor's patients) at a cost of Le, 200,000 (= € 40) per patients which included, registration, Examination, Medication and Continues follow-up treatment.

Thanking you very much in anticipation of your cooperation as we strive to restore sights to the underprivileged.

We are looking forward for your reply and remain.
With kind regards

Ibrahim R. Conteh
